

PROFILE

Results-driven Python Developer with experience in building scalable web applications, RESTful APIs, and AI-powered solutions using Python, Django, Flask, and FastAPI. Skilled in Machine Learning, RAG systems, backend development, and database management with PostgreSQL and MySQL.

TECHNICAL SKILLS

Programming Languages

- Python
- JavaScript
- SQL

Backend Technologies

- Django
- Flask
- FastAPI
- REST API Development
- JWT Authentication
- API Integration

Frontend Technologies

- HTML5
- CSS3
- JavaScript
- Bootstrap
- React.js

Databases

- PostgreSQL
- MySQL
- SQLite
- Firebase Firestore

AI / Machine Learning

- Machine Learning
- Deep Learning
- AI Agents
- RAG Systems
- Data Preprocessing
- Feature Engineering
- Model Training

EDUCATIONS

H.H. THE RAJAH'S COLLEGE
M.SC.COMPUTERSCIENCE(2023-2025)-80%

PROFESSIONAL EXPERIENCE

Python Developer

UKINFOTECH — Pudukkottai Oct
2025 – Present

- Developing scalable backend systems and enterprise-level web applications using Python and Django.
- Designing and implementing RESTful APIs for business automation solutions.
- Working with PostgreSQL and MySQL databases for efficient data handling and optimization.
- Developing AI-integrated modules and automation workflows for business applications.
- Collaborating on frontend-backend integration and responsive UI implementations.

Python Developer Intern

BY8LABS — Pudukkottai
Mar 2025 – Mar 2025

- Developed and managed RESTful APIs using Python and Flask.
- Implemented JWT-based authentication and authorization mechanisms.
- Built backend business logic and validated API endpoints using Postman.
- Improved API performance and structured clean backend architecture.

PROJECTS

POS Management System

Tech Stack: Python, Django, PostgreSQL, HTML, CSS, JavaScript

- Developed an enterprise-grade Point of Sale (POS) system for billing, inventory, and customer management.
- Implemented secure authentication, inventory tracking, and billing automation.
- Built scalable backend architecture using Django ORM and PostgreSQL.
- Designed responsive and user-friendly frontend interfaces.

Hospital Token Management System

Tech Stack: Python, Flask, React.js, REST APIs

- Developed a hospital queue and appointment management system.
- Built RESTful APIs for token generation and patient handling.
- Created dynamic React.js interfaces for real-time token updates.
- Improved patient workflow automation and reduced manual processing.

Gold Loan Management System

Tech Stack: Python, Django, MySQL, HTML, CSS, JavaScript

- Developed a loan processing and repayment tracking system.
- Implemented secure customer management and transaction handling.
- Designed efficient CRUD operations and reporting modules.

Managed backend database optimization and authentication workflows.
